

## DATASHEET - NOVAFLEX WHEEL STOPPER

Wheel stoppers are essential parking safety products designed to prevent vehicles from rolling beyond designated parking limits. Our **Rubber and Plastic Wheel Stoppers** are manufactured using high-quality materials to ensure durability, safety, and long-term performance in demanding environments. These wheel stoppers are widely used in **indoor and outdoor parking lots**, commercial buildings, residential communities, warehouses, and industrial facilities across the UAE.

Designed to **withstand moisture, UV exposure, and extreme temperature variations**, these wheel stoppers are perfectly suited for the harsh climatic conditions of the UAE. Whether installed in basement parking, open parking areas, or loading zones, they provide reliable vehicle positioning and enhanced safety for both drivers and pedestrians.

### WHEEL STOPPER

MADE FROM DURABLE HEAVY DUTY RUBBER, LONG LASTING WHEEL STOPPER

### Technical Specifications

Specification	Details
Material	Rubber / Plastic
Weather Resistance	UV, Moisture & Temperature Resistant
Installation Type	Surface Mounted
Fixing Method	Anchor Bolts
Vehicle Compatibility	Small & Large Vehicles
Usage Area	Indoor & Outdoor Parking

### Available Sizes

Product Type	Dimensions (mm)
Rubber Wheel Stopper	550 x 160 x 100
Rubber Wheel Stopper	900 x 150 x 100
Rubber Wheel Stopper	1650 x 160 x 105
Rubber Wheel Stopper	1830 x 150 x 100
Plastic Wheel Stopper	500 x 200 x 200

## DATASHEET - NOVAFLEX WHEEL STOPPER

### High-Quality Materials for Maximum Durability

Our **rubber wheel stoppers** are manufactured from **heavy-duty recycled rubber**, offering excellent impact resistance and flexibility. Rubber material helps absorb shock when vehicles come into contact, minimizing damage to vehicles while ensuring effective stopping performance.

The **plastic wheel stoppers** are produced using **high-density polyethylene (HDPE)** or equivalent engineering-grade plastic. These are lightweight yet strong, making them easy to handle and install while still providing high load-bearing capacity.

These wheel stoppers are designed to be **compatible with different wheel sizes**, making them suitable for:

- Small cars
- SUVs
- Pickup trucks
- Vans
- Light commercial vehicles

Our wheel stoppers are ideal for:

- Indoor basement parking
- Outdoor parking lots
- Shopping malls & commercial buildings
- Residential compounds & villas
- Warehouses & logistics centers
- Hospitals & schools
- Industrial facilities

Thanks to their **anti-slip base design**, they remain stable on concrete and asphalt
